Undergraduate Thesis

The Influence of Organizational Learning on SME Firm Performance in Surabaya through Entrepreneurial Orientation.

Micro, Small and Medium Enterprises (MSMEs) have a big role in the economy of Surabaya and Indonesia in general. The growth and sustainability of MSMEs is the key to creating jobs and supporting sustainable economic development. This research aims to analyze the impact of Organizational Learning (OL) on Firm Performance of MSMEs in Surabaya, with Entrepreneurial Orientation (EO) as a potential mediator. The focus of this research is to understand how an organization's ability to acquire, retain and increase knowledge can impact entrepreneurial orientation, as well as how this influences MSME business performance. Through a quantitative approach, data was collected from various MSMEs in Surabaya using a questionnaire. Data analysis reveals that all relationships between variables influence each other. The results of this research provide in-depth insight into the dynamics of the relationship between OL, EO, and MSME performance, contributing to better understanding, and supporting local and national economic development.
