

## **ABSTRACT**

This research is about the grammatical errors that occurred in the questions made by twenty children with different ages, from six years old to twelve years old. The writer categorized the errors that the children made based on Jack C. Richards' classification of errors in the use of questions. The writer wants to find out the frequencies of the errors that the subjects had made. She gave questionnaires to the twenty subjects of this research to gain her data. The data are all questions which contained grammatical errors. The writer used qualitative approach and she analyzed the subject by comparing all the errors that they made. The result of this research is that the respondent who made the highest number of errors in the three types of questions is the same respondent, that is the fourth respondent whereas, there are different respondents who did fewest errors in the three types of questions.

## **ACKNOWLEDGEMENTS**

The writer wants to give thanks to Jesus Christ for His greatest gift, love and faithfulness. She thanks Him because He never leaves her even in one second so that she could have strength and ability to complete this thesis.

She also wanted to give her great appreciation and thanks to Prof.Dr.Soekemi, MA, the best advisor who had patiently guided her and given many precious ideas in writing her thesis.

The writer presents her grateful also to her parents, Mr. Sastra Ali Gunawan and Mrs. Anita Gunawan for their sweet love and understanding. She also wants to thank them for always remaining her to use her time wisely. She gives her special thanks to Willy for always supporting and encouraging her to finish this thesis. She really appreciates his presents and helps whenever she needs him. She gives her thanks also to her sisters, Yeny and Chenny for their advices and also to her brother, David for his support and willingness to share the computer at night.

She also wants to thank her best friends: Betty, Meme, Aan and Jacky that always cheered her up whenever she felt down and also gave her the answers of things that she didn't understand yet. She wants to wish them good luck. She also gives her thanks to the twenty children for their willingness to give their time to answer her questionnaires. She hopes that this thesis brings new ideas and contributions for all the readers.
