Perancangan Interior Hokky Plaza Graha Famili Dengan Pendekatan *Crime Prevention Through Environmental Design* (CPTED) di Konsultan Supratman Arsitektura

Kriminalitas sudah menjadi sebuah fenomena yang sering terjadi pada era modern ini. Seiring dengan berkembangnya zaman, fenomena tersebut juga semakin berkembang di kalangan masyarakat, khususnya bagi mereka yang berada di kota – kota besar. Salah satu kota metropolitan dengan tingkat kriminalitas tertinggi adalah Surabaya, yang menduduki peringkat tiga pada tahun 2023 silam dengan kasus pencurian tertinggi. Kriminalitas yang terjadi disebabkan oleh banyak faktor dan tentunya mempengaruhi aktivitas masyarakat. Sebagian besar kriminalitas yang terjadi di Surabaya berpusat pada tempat keramaian, salah satunya merujuk pada brand pasar swalayan terbesar di Surabaya, yaitu Hokky. Pada swalayan ini terjadi pencurian yang dilakukan oleh salah seorang SPG atau karyawan setempat. Melalui hal ini perancangan dengan keamanan yang tinggi diperlukan sebagai solusi dalam permasalahan masyarakat. Salah satu konsep desain, yaitu *Crime Prevention Through Environmental Design* (CPTED) menjadi sebuah media yang digunakan sebagai solusi permasalahan kriminalitas tersebut. Metode design thinking akan digunakan untuk melakukan perancangan konsep ini, sehingga terbagi menjadi tahapan – tahapan yang melandasi proses perancangan nantinya. Dengan penerapan konsep serta metode ini, hasil perancangan yang ditinjau dari segi peletakkan dan material divisualisasikan melalui perspektif 3D serta produksi gambar kerja.

Kata kunci: *crime prevention through environmental design* (CPTED), interior pasar swalayan hokky, kriminalitas

ABSTRACT

Priscillia Helena Christianto:

Undergraduated Thesis

Crime Prevention Through Environmental Design (CPTED) approach in designing Hokky Plaza Graha Famili at Supratman Arsitektura Consultant

As time goes by, this phenomenon is also increasingly growing among society, especially for those in big cities. One of the metropolitan cities with the highest crime rate is Surabaya, which was ranked third in 2023 with the highest cases of theft. Crime that occurs is caused by many factors and of course influences community activities. Most of the crimes that occur in Surabaya are centered on crowded places, one of which refers to the biggest supermarket brand in Surabaya, namely Hokky. At this supermarket there was a theft committed by one of the SPGs or local employees. Through this, design with high security is needed as a solution to community problems. One of the design concepts, namely Crime Prevention Through Environmental Design (CPTED), is a medium used as a solution to the crime problem. The design thinking method will be used to design this concept, so that it is divided into stages that underlie the design process later. By applying this concept and method, the design results in terms of placement and materials are visualized through a 3D perspective and the production of working drawings.

Key words: crime prevention through environmental design (CPTED), interior hokky supermarket, crime
