

## 4. HASIL AKHIR KARYA PEMOTRETAN

### 4.1. Foto-Foto Pilihan Final

#### 4.1.1. Sumatran Tiger

Gambar 4.1.  
Sumatran Tiger –  
To Kill or To Be Killed

Gambar 4.2.  
Sumatran Tiger – The Breakaway

Model : Wisnu Wibisana

Make Up : Adelia K.

Hairdo : Erny Mila

“Being the last of 3 species of tiger that exists in Indonesia, Sumatran Tiger’s population is decreasing rapidly because of habitat loss due to deforestation done by human. With only 3.200 population left in the wild, this year, the Chinese zodiac year of the tiger, World Wildlife Fund puts a serious act to save the tiger immediately or they may disappear by the next year of the tiger in 2022.”

#### 4.1.2. Amur Leopard

Gambar 4.3.

Amur Leopard – Strangled

Gambar 4.4.

Amur Leopard – Eye for An Eye

Model : Nataleia Indah Susanto

Make Up : Maya Sari D.

Hairdo : Cherry Jessica & Marissa Megawati Pangestu

“Being largely poached for its beautiful and spotted fur, Amur Leopard is amongst the most endangered species from the big cat family. The last remaining population of Amur Leopard is estimated to be less than 40 individuals in the wild. Being critically endangered, serious act need to be taken for this species or they may extinct soon. ”

### 4.1.3. Orang Utan

Gambar 4.5.

Orang Utan – Leave Me Be

Gambar 4.6.

Orang Utan – The Breakdown

Model : Jessica Stephanie S.

Make Up : Maria Lido

Hairdo : Marissa Megawati Pangestu & Fadila Tuzzahra

“Orang Utan is one of the primate species that lives in Indonesia. There are 2 places that serve as natural habitat to Orang Utan in Indonesia, they are Sumatra Island and Borneo, Kalimantan. As one of the animals that resides in forest, Orang Utan population is going lower in times because of illegal logging that reduces a huge amount of trees, their home.”

#### 4.1.4. Giant Panda

Gambar 4.7.

Giant Panda – Hand in Hand

Gambar 4.8.

Giant Panda – For the Better

Model : Helga Juliana Lumempouw

Make Up : Adelia Sugianto

Hairdo : Jenni Halim

“Being universally loved and has a special significance for World Wildlife Fund as it has been the organization’s logo since 1961 when it was founded, Giant Panda is the rarest member of the bear family and amongst the world’s most threatened animals. As China’s economy rapidly developing, its bamboo forest habitat is increasingly fragmented by road and railroads, leaving its future uncertain.”

#### 4.1.5. Polar Bear

Gambar 4.9.  
Polar Bear – Polarized

Gambar 4.10.  
Polar Bear – Nuisance

Model : Vanessa Tanner

Make Up : Kelly Shintana

Hairdo : Marissa Megawati Pangestu, Melissa Phie, & Adhi

“Widely known as the iconic animal symbol of victim of the climate change, Polar Bear is losing its habitat to the warming trend as a result of the global phenomenon on earth, the global warming. The lack of ice threatens Polar Bear’s life, and if this problem persists, the scientists believe that this species will be vulnerable to extinction within the next century.”

#### 4.1.6. Bird of Paradise

Gambar 4.11.

Bird of Paradise – Preservation

Gambar 4.12.

Bird of Paradise – Half Alive

Model : Helga Juliana Lumempouw

Make Up : Stephanie Emmanuel

Hairdo : Julinar Tan & Seline Tiffany

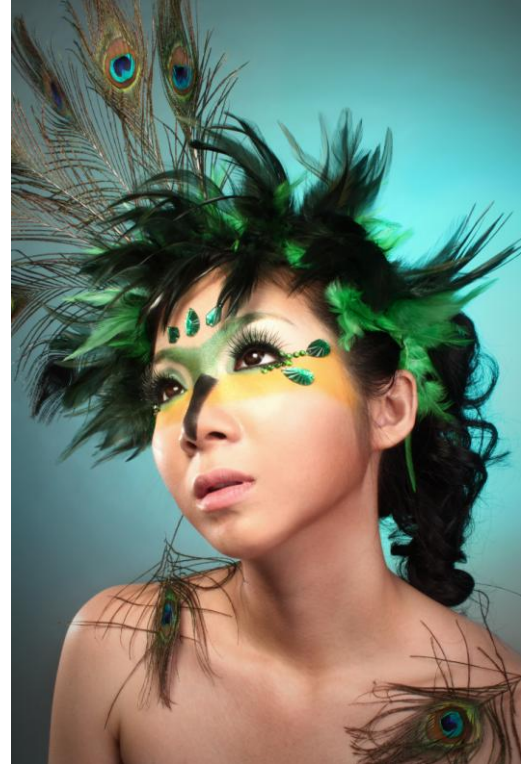

“Bird of Paradise, or well known as Cendrawasih, is famous for its exotic beauty. Lives in Papua, Indonesia, Cendrawasih is rare nowadays, because human keeps hunting and selling them as a mounted animal used for decoration. Although being protected by government’s law, illegal trading of Cendrawasih still happens, which keeps reducing Cendrawasih’s population today.”

#### 4.1.7. Green Peafowl

Gambar 4.13.

Green Peafowl – Ensnared

Gambar 4.14.

Green Peafowl – Fallen

Model : Theresia Setiana

Make Up : Melly Gunawan

Hairdo : Cherry Jessica

“Green Peafowl’s population is spread throughout its habitats in Southeast Asia, including Java Island. Best known for its magnificent tail feather’s beauty, human tends to capture and possess them for its beautiful feathers. Aside from their magnificent beauty, their number is also decreasing due to habitat loss, fighting with human races for a place to live.”

#### 4.1.8. Bearded Vulture

Gambar 4.15.  
Bearded Vulture –  
Inside Wants Out

Gambar 4.16.  
Bearded Vulture –  
A Fly in the Ointment

Model : Wisnu Wibisana

Make Up : Adelia K.

Hairdo : Fadila Tuzzahra

“Unlike any other vulture species that is bald, Bearded Vulture is unique amongst the vulture types. Bearded Vulture is one of the large raptor birds and the rarest one. Their population is scarce due to being captured and killed by human in order to protect livestock animals. Approximately only 100 breeding pairs exist in European mountains today.”

#### 4.1.9. Monarch Butterfly

Gambar 4.17.  
Monarch Butterfly –  
The Last Stand

Gambar 4.18.  
Monarch Butterfly – Blackout

Model : Alodia Sutrisno

Make Up : Kelly Shintana

Hairdo : Lira P. & Melissa Phie

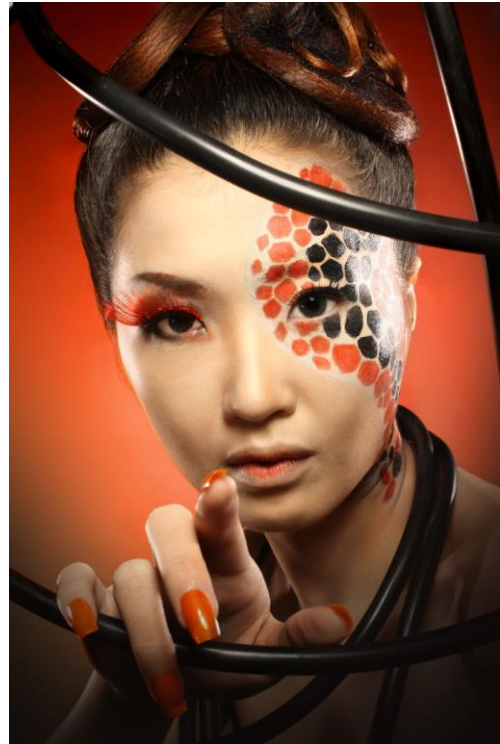

“Mentioned as one of the species in ‘10 species to watch in 2010’ list released by World Wildlife Fund, Monarch Butterfly has a biological phenomenon where they migrate each year from North America to their winter habitat in Mexico, but recent global climate change and their habitat loss due to deforestation by human has lessen their number significantly. Therefore, serious concern needs to be put upon this species or they may fall towards extinction soon.”

#### 4.1.10. San Francisco Garter Snake

Gambar 4.19.

San Francisco Garter Snake –  
Spellbound

Gambar 4.20.

San Francisco Garter Snake –  
The Boundaries

Model : Sianly

Make Up : Natty

Hairdo : Fadila Tuzzahra

“Has been dubbed as ‘the most beautiful serpent in North America’ for its scale fantastic colour, San Francisco Garter Snake is also the most endangered snake species in there. Over the past few decades, this snake’s preferred habitat has been hit hard by agricultural, residential, and recreational development, and in order to provide security for people, most of this snake found is captured for safety reason.

The remaining population is estimated to be around 1.500 snakes only.”

#### 4.1.11. Marine Turtle

Gambar 4.21.  
Marine Turtle –  
Entangled

Gambar 4.22.  
Marine Turtle –  
Hell or High Water

Model : Yohana Lukito

Make Up : Maya Sari D.

Hairdo : Ida Novita

“6 out of 7 species of Marine Turtle are listed as endangered animal, and 3 out of that 6 are listed as critically endangered animal. Although being one of the eldest animals that inhabits earth, Marine Turtle is currently facing serious danger of extinction. Each year worldwide, hundreds of thousands of Marine Turtle are trapped in nets from fisheries activities, since Marine Turtle is reptile, when they can't reach the surface to breathe, they drown.”

#### 4.1.12. Hector's Dolphin

Gambar 4.23.  
Hector's Dolphin –  
Over A Barrel

Gambar 4.24.  
Hector's Dolphin –  
Over Troubled Water

Model : Megawati Sukamto

Make Up : Kelly Shintana

Hairdo : Rindy & Melissa Phie

“7 out of 13 species of whale family are endangered, and Hector's Dolphin is one of them. Even after years of protection, whales and dolphins are still vulnerable to extinction. They are presently facing an ever-increasing danger, from climate change, pollution, habitat degradation, to the most dangerous of all, fisheries activities done by human. The remaining population of Hector's Dolphin is approximately 7.400 individuals.”

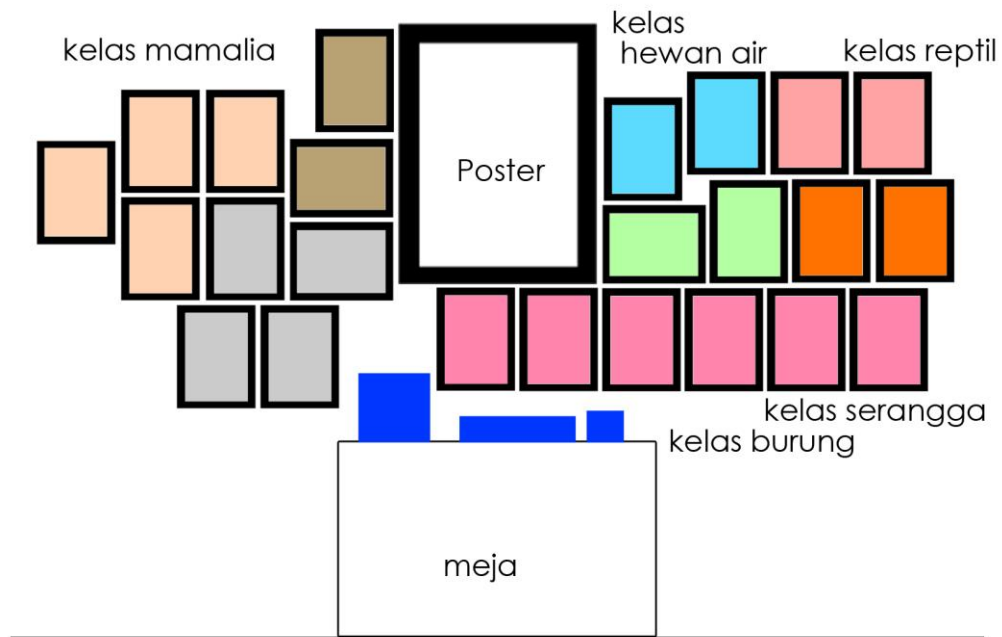

## 4.2 Penataan dan Presentasi Bentuk Final

Hasil foto final yang telah dipilih nantinya akan dicetak sebesar ukuran 12 RS (30x45 cm), lalu dikemas menggunakan pigura agar tidak mudah rusak maupun lekang karena waktu. Pigura yang dipilih berkesan minimalis, dengan frame polos warna hitam selebar 3 cm. Kesan minimalis dipilih agar karya terlihat modern dan *edgy*, serta bisa sesuai dengan penyajian displaynya nanti karena sifatnya yang minimalis dapat digabungkan dengan penataan dengan baik. Kemudian warna yang dipilih adalah hitam sebagai warna netral, dan cocok dengan seluruh hasil foto final. Warna netral yang dipilih adalah hitam, bukan putih, karena hitam terkesan lebih mewah dan modern, serta kebanyakan foto pilihan final bernuansa gelap.

Gambar 4.25. Contoh pigura karya

Kemudian display penataan untuk pameran nantinya akan ditata pada ketinggian yang optimal, sehingga mudah dan enak dilihat. Foto akan dikelompokkan berdasarkan jenis binatang dengan penggolongan pada kelas mamalia, kelas burung, kelas reptile, kelas serangga, dan kelas hewan air. Di tengah-tengah display dipasang poster sebagai pusat perhatian. Lalu diletakkan sebuah meja untuk memajang kelengkapan karya pameran, antara lain katalog, album behind the scene, dan lain-lain.

Gambar 4.26. Contoh display karya
