Thesis

Hero

Bullying has already happened for a long time. Most of the cases leave the victims in a traumatic phase, which leads them to suffer several mental disorders, such as depression and PTSD (post-traumatic stress disorder), which continue until the adult phase, and or even suicides. The worst part is those cases happen during the school period, which is a critical phase since it was the period where teenagers are in their phase to learn about themselves. However, although there are many bullying cases already coming out to the public, most people still did not know and did not understand well about bullying itself and the effects. Many victims also keep their mouths closed and tend to accept the bullying instead of face it off. This animation project purpose is to increase people's awareness and encourage the victims to face their bully but in a positive way.

Keyword(s): bullying, animation, mental disorder

Skripsi

Hero

Bullying telah ada sejak masa lampau. Sebagian besar dari kasusnya meninggalkan para korban dalam kondisi trauma, membuat mereka mengalami gangguan mental, seperti depresi dan PTSD (*post-traumatic stress disorder*), yang lalu berlanjut sampai tahap dewasa, dan atau berakhir bunuh diri. Yang paling buruk adalah kasus-kasus tersebut terjadi selama masa sekolah, yang merupakan fase kritis karena merupakan masa dimana para remaja mencari jati diri mereka. Namun, walaupun sudah banyak kasus *bullying* dimunculkan di public, masih banyak yang tidak tahu dan tidak paham dengan baik tentang *bullying* itu sendiri dan efek yang ditimbulkan. Banyak korban juga menutup mulut mereka dan cenderung menerimanya daripada menghadapinya. Tujuan dari karya animasi ini adalah untuk meningkatkan kesadaran masyarakat dan mendorong para korban untuk menghadapi pelaku *bullying* dengan cara yang positif.

Kata kunci: *bullying*, animasi, gangguan mental
